Art Unit: 3662

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-8, 10-13, 15-17, 19-23, 25-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Nichols (Pat. No. 6,433,866).

Nichols teaches a method and apparatus for resolving ambiguities in a satellite position navigation system including a base station located at a known location comprising a first satellite receiver 56 capable of receiving navigation satellite signals; a laser transmitter 58; a mobile station comprising a second satellite receiver 68 capable of receiving navigation satellite signals; a photodetection device 70 for receiving laser beams generated by laser transmitter; an arithmetic processing unit 58 for processing the laser in order to calculate an elevation angle (col 2, line 48-col 3, line 3; col 15, lines 16-21) between the laser transmitter on the base station and the mobile station; and a data processing unit 72 in communication with the first and second satellite receivers for determining the location of the mobile station, processing unit configured to resolve carrier phase ambiguities (col 7, line 64-col 8, line 13) based at least in part on the elevation angle.

3. Claims 2, 9, 14, 18, 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 27-29 are allowed.
